PROFESSIONAL SUMMARY

Information Technology Analyst graduate from Universidad ORT Uruguay. I build solutions that simplify how organizations work, from understanding their needs to delivering working software. My experience combines web and desktop applications, system integrations and data analysis.

EDUCATION

Universidad ORT Uruguay | Information Technology Analyst | 2023 - 2026.
Intermediate qualification: Programming Analyst. Grade average: 94%.

WORK EXPERIENCE

Computer Systems Operator | CASMU | 2020 - Present

Monitor system operation, analyze activity records and data, and investigate incidents through database queries and file reviews. This work helps identify problems and provide the information needed to resolve them.

SELECTED PROJECTS

Mayorista Javier | Business management and product catalog. Built a system that replaces paper orders and brings inventory, purchasing, sales and business indicators together. Developed the web catalog so customers can browse products and prices and send orders through WhatsApp. The business can load them in seconds; the client estimates a saving of approximately 15 minutes per order.

Ratio for Espina | Integrated construction management. Collaborate with Ing. Luis Terzano on a system bringing together construction budgets, costs and planning, tailored to Uruguay. My contribution includes complete feature development, security and user management, activity records, Excel data exchange and Inno Setup installers. Also modernized the interface and visual identity to make the system easier to use.

Jaume & Sere | Meeting room bookings. Contributed to the team analysis and development of a solution replacing the paper booking diary. It centralizes bookings and cancellations, integrates corporate sign-in and emails invitations and updates to participants. The organization reported that bookings incorrectly blocking rooms were eliminated.

ADDITIONAL TRAINING

Big Data certificate (ORT) and GeneXus 18 Analyst | 2026.
Web Development, JavaScript and React (Coderhouse) | 2023. PC and Networks (BIOS) | 2017.

TECHNICAL SKILLS

Development: C#, .NET, React, WPF, Java, JavaScript, TypeScript, Python and SQL.
Data and tools: PostgreSQL, SQL Server, MongoDB, Git, Docker, Azure, AWS and GeneXus.
Data analysis: Power BI, Tableau, Pandas and Apache Spark.
